# 3DSlicer training.

---

What's the important. What do the students need?

Lesson format

Objectives

Structure

Exercises

Let's create our first lesson

# 3DSlicer training.

What's the important. What do the students need?

Let's think about what the students needs:

Competences

Skills

Learning by doing

Analyze

Be critical

# 3DSlicer training.

Lesson format

Let's think about what the students need:

Are the lessons theoretical or practical?

What resources do I have?

Do I have a criteria to choose?

# 3DSlicer training.

## Objectives

...

To make them find information

To make them establish criteria to choose a tool

To help them to solve a problem

To help them to achieve a goal

...

# 3DSlicer training.

Structure

## THEORETICAL

5 mins To show the contents

5 mins To and make clear the objectives of the session

20 mins To present theoretical content

20 mins To solve a problem

# 3DSlicer training.

Structure

## PRACTICAL

5 mins To show the contents

5 mins To and make clear the objectives of the session

10 mins To present the theoretical base of the practical exercise

20 mins To do the exercise

20 mins To present the results

# 3DSlicer training.

Exercises

THEORETICAL/PRACTICAL

How difficult is it according to their level?

Is it better if they solve it in groups?

What should be the number of students in the group?

Will they need help or resources? (computers, internet...)

Do I need a presentation to check how they solve the exercise?

# 3DSlicer training.

Let's create our first lesson

Make groups of three

Go to: [https://mt4sd.ulpgc.es/slicer-int/index.php/P%C3%A1gina\\_principal/en](https://mt4sd.ulpgc.es/slicer-int/index.php/P%C3%A1gina_principal/en)

Choose one theme

Create the structure of a theoretical lesson for your students

Make a presentation of your work

**ENJOY YOUR LESSON!!!**
