Introduction

During the next month of December, the hardware systems to be installed at the Faculty of Medicine (University of Nouakchott) will arrive to their final destination. This visit is intended to explain details about this equipment, the launch of training programs at the university and the preparation of projects for the next 30PW NA-MIC to be held at the university of Las Palmas de Gran Canaria. Besides, one of the horizontal actions in equality and non-discrimination has been organized to be held at the Faculty of Sciences during this visit.

Agenda

21st November 2018. 9:00-13:00.

Location:

Université de Nouakchott Al Aasriya - Faculté de Médecine.

Agenda:

09:00-11:00 Agenda meeting changes.

11:00-13:00 Training reports information gathering. Mr Septy's PhD proposal discussion.

16:00-20:00 Training material preparation.

Description

During this meeting different aspects of the training have been exposed and, according to this, the agenda for days 22 and 23 has been modified in order to answer the dean of the Faculty request. The training for the next day should be focused on a better understanding of the 3DSlicer tool as a resource for teachers and students. Its introduction in the training programs must be tackle with an educational point of view that facilitates the understanding of its ecosystem.
